IX. Inclement Weather

- A.** Games shall be postponed when GRPD determines the field to be unplayable. **Managers** should contact the Recreation & Parks Department AFTER 12pm, and players should contact their managers. Game status updates will be available by calling the weather hotline at 252.329.4299.
- B.** Team managers and players are encouraged to sign up for Rainedout.com that will notify them when games are canceled (standard text messaging rates will apply).
- C.** Managers need to make sure they have the official word from the umpire at the field or athletic staff that a game has been canceled. The original schedule will not be changed. Rained out games will be made up at the end of the regular season play, as much as possible.
- D.** All games stopped due to inclement weather will be played as a new game; **UNLESS** 4 complete innings (three and one half innings if the home team is ahead) have been played, in which the score stands.
- E.** The City of Greenville has developed the following inclement weather guidelines to ensure early response in various inclement weather situations. The National Weather Service issues weather advisories, watches and warnings to inform the public of inclement weather. Staff will stay attuned to these advisories and modify programs accordingly. Inclement weather judgment calls to cancel, suspend, postpone and resume are case by case depending on the forecast, radar development and visual observations of the sky. Should any of the following triggers occur causing undesirable and unsafe conditions; staff will alert the cancelation, suspension or postponement of an activity by using a whistle, air horn or megaphone. Participants, volunteers and other staff will be directed to a safe location until the threat or danger has passed and activities can resume.

Weather events include:

- Extreme Temperatures
- Severe thunderstorm watch or warning
- Lightning
- High winds
- A tornado sighting or warning

EXTREME TEMPERATURES

HEAT ADVISORIES

The heat index ranges issued by the National Weather Service range from little danger from heat; 65 ° - 81 ° too dangerous to health; 106 ° - 115 ° and above. High air temperatures and relative humidity distress individuals differently. Parents of children, adult participants and staff should take into consideration their own physical health conditions in making the decision to participate in an outdoor activity during a heat advisory. Proper hydration including the use of sunscreen, resting in shaded areas and wearing proper attire will be emphasized.

Action:

Staff will monitor heat index levels along with other weather related variables to determine if an activity needs to be postponed.

WINTER WEATHER

Program modification may take place when temperatures are forecasted to be or fall below 40 degrees. Outdoor activities may be cancelled or moved indoors. If temperatures fall below 40 degrees during an activity, staff will monitor the situation and take action if necessary.

Action:

In the event of inclement weather involving snow and ice, program modification and a change to facility operating hours may take place. Any closings or adjustments to facility hours will be determined by the City

Manager or Director of Recreation and Parks. Decisions regarding cancellations or adjustments to programs can be made by Recreation staff.

SEVERE THUNDERSTORMS

Staff will monitor all available weather alerts issued by the National Weather Service, media and what is visibly seen and heard while outdoors. A severe thunderstorm can produce damaging winds up to 58mph with heavy down pours, and possible hail. There is a potential risk of flying debris, localized flooding and lightning strikes.

LIGHTNING AND THUNDER

Program modification will take place when lightning is detected within 10 miles of the facility by radar, visual monitoring or if thunder is heard. Staff will monitor all available weather alerts issued by the National Weather Service, media and that is seen and heard while outdoors. Lightning is an electric spark discharge in the atmosphere, occurring within a thundercloud, between clouds, or between a cloud and the ground. Lightning is very dangerous and is accompanied by tremendous flashes and roars of thunder. Outdoor activities will be suspended when lightning is detected within 10 miles of the facility. The location of lightning can be determined by the NWS, a storm monitoring device and by counting time between thunder and lightning strikes. Once lightning is seen, count the number of seconds until you hear thunder. Divide the number of seconds by 5. The answer is distance in miles of the lightning. Therefore, 10 miles would be 50 seconds.

Action:

If lightning is seen, or thunder heard, immediately suspend outdoor activities. Seek shelter* immediately and avoid trees, canopies, or tents. No activity will resume until there is no less than 30 minutes from the last strike or from the last sound of thunder is heard. Staff will keep track of time to ensure activities are not resumed until it is safe. Once the threat and danger has passed staff will announce that it is safe for the activity or event to resume.

People who have been struck by lightning do not carry an electric charge. Therefore, it is safe to perform CPR, if needed. Ideally, injured persons are moved into a safe shelter. Lightning-strike victims who show signs of cardiac or respiratory arrest need emergency help.

WIND

Program modification will take place when strong gusts of wind are detected by radar. Staff will monitor all available weather alerts issued by the National Weather Service, media and take initiative to secure loose objects to prevent objects from becoming airborne projectiles.

Action:

In conditions of winds reaching 58 MPH or higher (according to NWS weather reports) outdoor activities are to be suspended. All participants and staff will be advised to immediately seek cover indoors or in an enclosed vehicle away from trees or areas where things can become airborne. Once the threat and danger has passed staff will inspect the area to ensure it is safe and announce that it is safe for the activity or event to resume.

TORNADO WARNINGS & WATCHES

A **Watch** means there is a potential for a Tornado or the Tornado exists and a **Warning** means it is happening or very likely to happen. Program modification will take place when a tornado warning is issued. Staff will monitor all available weather alerts issued by the National Weather Service and media. Immediate action will be taken to safe guard the health and well-being of all individuals in the immediate area.

Action:

When a tornado warning is issued within Pitt County, outdoor activities will be suspended. Staff will advise all participants, staff and spectators to immediately move indoors and seek shelter*. Participants and staff will be directed to an area indoors away from windows and doors. Staff will continue to monitor the location of

the tornado and prepare participants to respond. Large gym areas will be avoided at this time. Staff will instruct participants to get under a heavy piece of furniture or inside interior closets if the tornado threatens the immediate area. Participants and staff will assume the protective position by squatting low to the floor and covering their head. Children, visitors and participants may need guidance to prepare for a tornado. Never remove a person from a wheelchair. Have them bend over safely and put their hands over their head. Once the threat and danger has passed staff will check the health and well-being of all participants, contact EMS if there are injuries, assess damage and guide participants to safety.

SHELTER*

Shelter is defined as an ideal safe structure or fully enclosed building with plumbing, telephone and electrical service, which aid in grounding the structure. A fully enclosed automobile or school bus with all of the windows rolled up is a reasonable shelter, although care must be taken to avoid contact with any metal inside the vehicle. Golf carts and convertible cars are not safe shelters. Dugouts and golf shelters are not safe shelters and are not grounded for the effects of lightening.

Avoid the use of shower facilities for shelter and do not use showers or plumbing during a thunderstorm. Electrical current from lightening can enter the building through plumbing connections. It is also unsafe to stand near utilities or use a landline telephone during a thunderstorm because of the risk of the current traveling through the lines. Cellular and cordless telephones are considered to be safe.

If a suitable safe shelter is not available, it is best to avoid tall objects (trees, light poles, etc) that allow lightning an easy path to the ground. It is important to avoid being the tallest object. In an open field, people should crouch with their legs together, the weight on the balls of their feet, arms wrapped around their knees, and head down with their ears covered. The person should minimize contact with the ground and should not lie flat.
