Major Work COAs

COA 2021-0012: 407 S. Jarvis Street

Request:	After-the-fact COA – add handrail to the front porch
Applicant:	Rob O'Connor
Location:	407 S. Jarvis Street
Parcel Number:	14412
Historic Status:	Contributing
Attachments:	1. Site Photos 2. Supplemental Materials 3. Location map of property

The Commission should consider this request based upon general conformance with the *Design Guidelines*.

Description: Erected in 1925 as a two-storied duplex, this frame gable-roof house has features associated with the Craftsman Bungalow style. Knee braces and single and paired four-over-one sash windows illustrate elements of the style. A large gable-roof porch covers the full width of the three bay façade.

Project Analysis: Stairways having four or more risers above a floor or finished ground level shall be equipped with handrails located not less than 30 inches nor more than 38 inches above the leading edge of a tread. An exception from this standard is that handrails that form part of a guardrail may be 42 inches high. The applicant installed a handrail to bring the front porch up to current city code for the safety of his tenants and their guests.

From the *Design Guidelines* (shortened to include only those that apply):

<u>Chapter</u>	<u>Title</u>	<u>Pages</u>
2	Porches, Entrances, and Balconies	41-43

1. Historic porches, entrances, and balconies must be retained and preserved.
2. All architectural features that are character defining elements of porches, entrances, and balconies, including piers, columns, pilasters, balustrades, rails, steps, brackets, soffits, and trim must be retained and preserved.
8. The introduction of reversible features to assist people with disabilities must not diminish or damage the original design or materials of the porch or entrance.

Staff Findings: The handrails are reversible features which do not diminish or damage the original design or materials of the porch or entrance. There are no added elements or details to create a false historic appearance.

Design Review: The DRC met with the applicant, Rob O'Connor, who had added hand rails and porch rails to the property after a visitor had fallen off the porch. Neither of the features are original to the property. The applicant volunteered to remove the porch rails. The DRC approved the handrails as installed.

The Commission should consider this request based upon general conformance with the *Design Guidelines*.

Description: Erected in 1917, the Proctor-Yongue House, 601 E. Fifth Street, is a substantial two-story frame house was built in the Colonial Revival Style. The house and grounds have undergone renovations over the past several years. The Dail House, 605 E. Fifth Street, was built in 1921. The home represents the most academically fashioned house in the district, the five bay, blonde brick house is a striking example of domestic Renaissance Revival architecture.

Project Analysis: This is a continuation of renovation work on the Proctor-Yongue House located at 601 E. Fifth Street. The applicant wishes to create a landscape utilizing native species while removing an invasive and non-native species of bamboo. There will also be renovations to the driveway and the back entrance to conform to the Americans with Disabilities Act (ADA). The project will remove the planter wall between the Proctor-Yongue House and the Dail House (605 E. Fifth Street) as well as merge the two independent driveways together.

WHEREAS, City Council of the City of Greenville by ordinance #1925, dated 8 December 1988, enacted and established powers and authorities under the new Historic Preservation Commission to act as both a historic district and historic landmarks commission for the City of Greenville;

WHEREAS, the City Council authorized the enactment of an ordinance to prevent the demolition of any designated historic landmark or any building or structure within a designated historic district due to neglect;

WHEREAS, demolition by neglect permits a property owner or one who has possession, custody and control of property to permit designated historic landmarks or buildings or structures within a historic district to suffer such deterioration, potentially beyond the point of repair, as to threaten the structural integrity of the structure or its relevant architectural detail to a degree that the structure and its character may potentially be lost to current and future generations.

WHEREAS, to promote the purposes of historical preservation, property owners of historic landmarks or buildings or structures within the designated historic district of the city should maintain or cause to be maintained the exterior and structural features of their properties and not allow conditions of neglect to occur on such properties; and

WHEREAS, without an anti-demolition by neglect ordinance, property owners are permitted to neglect such properties until demolition is the only remedy.

NOW, THEREFORE, BE IT RESOLVED by the Historic Preservation Commission of the City of Greenville that it does hereby request the City Council to enact an anti-demolition by neglect ordinance to protect, safeguard and promote the historical preservation of designated historical landmarks and the preservation of any building or structure within a designated historical district.
