

HOMESCHOOL "OLOGY" SERIES

This series of programs will focus on different areas of scientific studies.

PROGRAM DETAILS:

Mammalogy:

We will discuss what mammals live in ENC & which ones we can be found in the park, then head out on the trail to see if we can find any or signs of where they have been.

453029.01 Wednesday March 1 10:00AM - 11:30AM

Geology:

Many people think of places like the Grand Canyon when they hear about "geology", but there is a lot of geological importance right here in Greenville! We'll go over some geology facts & then search for any clues about the past. We may even find some shark teeth...!

453029.02 Wednesday March 15 10:00AM - 11:30AM

Ornithology:

Birds are one of the best types of animals to study in parks because it seems like they're always out! Let's discuss some of the different features of birds & what types of birds live in/ visit the park.

453029.03 Wednesday April 5 10:00AM - 11:30AM

Ichthyology:

Ichthyology is the study of fish. There are plenty of different types of fish in the lake at Wildwood as well in the Tar River. We'll talk about our various freshwater fish species, play Backyard Bass, & see if we can hook into anything with a rod & reel!

**Maximum number of participants is 12.*

453029.04 Wednesday April 19 10:00AM - 11:30AM

Dendrology:

Wildwood Park is home to many species of trees. After a discussion about trees, we'll test your tree identification knowledge out on the trail & learn about some of the common tree species in the park.

453029.05 Wednesday May 3 10:00AM - 11:30AM

Herpetology:

Eastern North Carolina has a rich & diverse population of reptiles and amphibian life. Join us as we explore the park in search of snakes, turtles, frogs, toads, lizards, skinks, & Salamanders.

453029.06 Wednesday May 17 10:00AM - 11:30AM

- Fee: \$7, Greenville Resident \$5.
